

Calculation Example

- What is risk
- What is risk ratio
- What is alternate risk ratio
- Comparison group

Example of a risk ratio calculation: assume three race/ethnicities and a school district with 300 students

Example of an alternate risk ratio calculation

Significant Disproportionality **SDE Recommendations**

- Reasonable minimum cell size 10)
- 30) Reasonable minimum n-size
- 3 Reasonable threshold
- 3 Number of years
- Standard for reasonable progress C-
